

Toys & Accessories

The above photo shows the optional polycarbonate flooring with radius corners and the optional paper holder. This unit is 5'd x 6'w foot so there are 3 - 24" paper rolls. The paper holder is made to the width of the cage and is built to run from the back of all cages. Cages that are 4' or 6' wide may run the paper from the side instead. "MOM BOX"...As original designer our "Memories of MOM" depicts the safety and comfort your bird had as a baby. We've found that "feather pickers" and neurotic birds stop picking and calm down as they use the MOM box. The birds relish the soft fingers of cloth touching their feathers and skin while the small space provides the security they need. Made of untreated white pine the box is safe for the birds that need to chew. "Sassafras Stackers" designed to be destroyed, avoid behavior problems before they begin or help to eliminate existing faults. All our wood is safe. We use only natural sassafras that has never been treated. The birds love it! By having an activity that is natural such as chewing and destruction of these wood stackers we have found that undesirable problems abate, their stress levels decline and their general attitude mellows out.
